

§17.43.130. Trucks and Vehicles

No truck larger than a passenger two-ton pickup truck or van may be parked overnight at the site of a home occupation. The Planning Commission may issue a conditional use permit, or the Director of Community Development may impose limitations of the parking of fleet vehicles at a residential lot when a home occupation permit has been issued. The intent of this section is that while recognizing that some businesses may own, lease, or operate more than one vehicle, the residential site shall not become the parking lot and storage area for the business.
