

7.6

LANDFILLS AND LAND EXCAVATIONS - SPECIAL REQUIREMENTS

7.6.6.10

EROSION CONTROL AND LANDSCAPING.

All cut and fill surfaces created by grading except for firebreak purposes shall be planted with a ground cover that is compatible with the natural ground covers in the County. Topsoil is to be stockpiled during rough grading and used on cut and fill slopes. When slopes too steep to support continuous ground cover have been permitted and in lieu thereof niches and ledges provided for planting, such slopes need not be planted with a continuous ground cover, but may instead be screened with vines and plantings. Cuts and fills along public roads may be required to be landscaped so as to blend into the natural surroundings. All plant materials must be approved by the Planning Commission prior to issuance of a conditional use permit.
