

13-4-3 Culinary Water

Satisfactory evidence of an adequate supply of culinary water for each lot shall be submitted with each application for approval of a subdivision as follows:

(a) For subdivision utilizing central system:

(1) Written evidence from a recognized water supply agency indicating:

(i) that the agency agrees and has the ability to supply the culinary water to the development,

(ii) that the petitioner has satisfied all requirements of said agency relating to conveyance of water rights, payment of fees, etc. and

(iii) that each lot has been granted a permanent, non-revokable water connection. (Where such status is evidenced through the

issuance of a stock certificate or similar document, said approval shall indicate the certificate number assigned each lot).

(2) Evidence satisfactory to the County that the transmission lines, storage reservoirs, and other system elements have adequate pressure and capacity to meet culinary water needs of the project at levels not less than specified by the State Health Department. 2. Individual well or spring system: Approval from the State Engineer, authorizing the use of water from the proposed source for domestic purposes: also, written evidence to the effect that water from well sources or spring is available in adequate quantities and conforms to minimum quality standards for culinary use as evidenced by a written statement from the health authority. (*Res. 10-3-84-A*)
