

17.05.150: REFUSE SITING STANDARDS:

- A. Every commercial, industrial/manufacturing facility, or other like uses, shall provide the following:
1. All containers shall be kept at a location easily accessible by collection vehicles, refuse producers, with vehicle access from an approved hard surface. While collecting refuse, vehicles shall not obstruct any portion of the public right of way.
 2. No refuse collection areas shall be permitted between a road right of way line and the minimum building setback line.
- B. For residential uses a space for refuse storage containers shall be provided on private property and accessible from the public right of way. This space shall be design in a manner to not prohibit the flow of traffic during collection. (Ord. 2004-10, 8-10-2004)
